

# Acceptance Criteria Guide

Last updated by | Alex Nguyen | Oct 16, 2018 at 10:24 PM GMT+5:30

- Panels

1. Standard layout:

- a. For multi-panel screens, the panel with more grid columns should be wider.
- b. Panel width should be adjustable.

- Grids

1. Standard layout:

- a. Columns should extend to width of grid.
- b. Column width should be adjustable.

2. Standard naming convention:

- a. Grid title should include subject name, e.g. Add/Edit/Delete Contact.
- b. Grid column names should not include subject name, e.g. Contact Name and Contact Description should only be Name and Description.

3. Requirement considerations:

- a. Paged?
- b. Filterable?

- Modals

1. Standard naming convention:

- a. Modal title should include subject name, e.g. Add/Edit/Delete Contact.
- b. Modal field names should not include subject name, e.g. Contact Name and Contact Description should only be Name and Description.

2. Standard buttons/icons:

- a. For Assign modal, the Save button should be used in place of Add button.

3. Requirement considerations:

- a. Should the field name and/or description be unique? If so, use duplicate name guideline below.

- Validations and Error Messages

1. Duplicate name validation:

- a. Engineer to use BC default of red exclamation mark and error message (below) appearing next to modal field
- b. Standard acceptance criteria language: "Standard red exclamation mark error for duplicate names should appear and block submission if users attempt to add duplicate template names."
- c. Error messages:  
"An item with the name [entered name] already exists in the system"  
"This field does not belong to this dataset"

2. Applicable to multiple fields:

- a. Use error message popup

3. Requirement considerations:

- a. Required, optional, or conditional?
- b. Data type constraint (e.g. SQL varchar type to match string data type)?

- c. Data format constraint (e.g. phone number)?
  - d. Character limit greater than 100 or 255?
- All Clients/Use Case/All
    - 1. Is this required? If so, do we need Client column?
    - 2. Client and use case top filters are always selected as default.
    - 3. As a default, ALL-ALL should have no data and grid buttons should be disabled.
  - Security
    - 1. Which BC application area should this feature menu item reside?
    - 2. Which user group should have rights?
